

UI/UX Design & Button Specification Document

Project: HireSense (AI-Powered Applicant Tracking System)

Document Version: 1.0.0

Author: Antigravity Principal UI/UX Architect

Status: Approved

Target Experience: Cinematic, Glassmorphic, and Highly Responsive Interfaces

1. Design System & Style Tokens

To establish a premium first impression, the HireSense user interface adheres to a strict, highly polished design token system. It supports two ambient modes: Cyber Slate (Sleek Dark Mode) and Nordic Glass (Clean Light Mode).

1.1 Color Palettes

Ambient Backgrounds & Surfaces

- Cyber Slate Background: #07070a (Deep Slate Black)
- Nordic Glass Background: #f9fafb (Soft Warm White)
- Card Surface (Dark): rgba(15, 15, 22, 0.65) (Glassmorphic dark background with backdrop-filter: blur(16px))
- Card Surface (Light): rgba(255, 255, 255, 0.75) (Glassmorphic white background with backdrop-filter: blur(16px))

Accent Colors

- Primary Glow (Indigo): #8b5cf6 (Used for primary action states, active navigation links, and focus boundaries)
- Secondary Glow (Cyan): #06b6d4 (Used for system status indicators and real-time syncing logs)
- Success (Emerald): #10b981 (Used for candidate acceptances, verified fields, and matches above 80%)
- Warning (Amber): #f59e0b (Used for middle-tier scores, missing skill alerts, and compliance flags)
- Danger (Crimson): #ef4444 (Used for candidate rejections, upload error flags, and bias violations)

2. Core Dashboard Screen Layouts

The application's layouts utilize flexbox and CSS grids, adhering to a responsive, mobile-first design strategy.

2.1 Screen 1: Recruiter Kanban Board (Recruiter Facing)

- Layout Composition:
 1. Left Navigation Bar (15% width): Fixed vertical panel containing app brand logo and icon links (Dashboard, Job Posts, Compliance, Settings).
 2. Center Kanban Pipeline (55% width): Scrollable horizontal board containing columns representing recruitment states:
 - Pending Uploads
 - AI Screened
 - Interviewing
 - Hired / Passed.Each column contains vertical grids of candidate cards. Cards display candidate name, top skills, dynamic match score circular badges, and Fair Mode indicators.
 3. Right Quick-Profile Drawer (30% width): Hidden by default. Slides out smoothly from the right side when a candidate card is clicked. Contains full parsed resume details, chronological experience, and explainable AI metric charts.

2.2 Screen 2: Candidate Portal (Student Facing)

- Layout Composition:
 1. Top Navigation Banner: Elegant thin banner containing the HireSense logo, active account settings, and a notifications bell.
 2. Upper Hero Upload Zone: High-fidelity glassmorphic card containing a drag-and-drop file target. Once a PDF resume is dropped, a progress ring dynamically tracks upload and parsing states.

3. Lower Application History: A linear table detailing active applications, matching scores (if allowed by the employer), and real-time status trackers featuring step-by-step progress connectors.

3. Function Button Specification & UI Usages

This section maps every critical button and interactive control in the HireSense website, outlining its visual parameters, event triggers, and database bindings.

3.1 Button Specifications Directory

| Control ID | Screen / Component | Button Label / Icon | Hover Visual Transition | Client Event Trigger | API Endpoint & DB Binding | Success State Action |

| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

| btn-upload-dropzone | Student Portal Hero | *Drag & Drop PDF or Browse File* | Dotted border color transforms from rgba(255,255,255,0.15) to primary Indigo (#8b5cf6). Background gains radial glow. | File drop or input select. Runs secure_filename() validation check. | /api/v1/resumes/upload (REST POST) | Ring animation triggers; task process_resume is enqueued in Redis. |

| btn-submit-profile | Student Portal Form | Confirm & Submit Application | Background scales up slightly. Shadow glow expands. | Form onSubmit event, serializing inputs into JSON. | /api/v1/applications/submit (DB Insert to

match_results) | Toast message alerts: "Application Submitted Successfully!". |

| btn-toggle-fair-mode | Recruiter Dashboard Header | Bias Prevention (Fair Mode) | Lever shifts smoothly to the right, color transitions from muted gray to Success Emerald (#10b981). | State toggle changes local variable fairModeEnabled. | /api/v1/scoring/weights (Triggers real-time DB query shift) | Kanban cards dynamically slide and re-order themselves based on experience-free matching algorithm. |

| btn-calculate-match | Recruiter Details Drawer | Trigger Re-Evaluation | Button scale shifts down slightly (press effect). Spinner icon rotates. | Dispatches trigger calculating semantic embeddings and taxonomies. | /api/v1/scoring/evaluate (Calls NIM Racing Service) | Explainable match dials animate up to their fresh scores. |

| btn-generate-audit | Compliance Center | Generate Compliance Report | Ambient gold shadow glow. Cursor shifts to pointer. | Trigger for NYC LL144 compliance reporting. | /api/v1/compliance/report (SQL select aggregates) | Slides down a modal displaying statistical demographical audits. |

| btn-sync-calendar | Details Drawer (Interview) | Schedule Interview / Sync Calendar | Transforms from indigo solid to deep indigo. SVG icon slides down 2px. | Launches OAuth popup syncing credentials. | /api/v1/scheduler/sync (Binds with Microsoft / Google Calendar API) | Success Toast alerts: "Calendar Synchronized successfully!". |

| btn-filter-kanban | Recruiter Header Filters | Min Score Slider | Track bar glows bright Cyan (#06b6d4). Tooltip displays exact value. | onChange sliding values. | Local state state hook (Filters in-memory Kanban card array) | Cards matching score less than \$X%\$ fade out with opacity transitions (opacity: 0). |

4. Cinematic Motion & Micro-interactions Specifications

4.1 Card Transitions & Hover Dynamics

- Translation: When hovered, cards translate vertically by -6px:

```
transform: translateY(-6px);
```

- Easing & Timing: All transforms must use a uniform cubic-bezier function to feel premium and avoid abrupt changes:

```
transition: all 400ms cubic-bezier(0.16, 1, 0.3, 1);
```

- Shadow Expansion: Hover states expand the CSS shadow and add a subtle primary accent drop shadow:

```
box-shadow: 0 20px 40px rgba(0, 0, 0, 0.4), 0 0 30px rgba(139, 92, 246, 0.05);
```

4.2 Loading Skeletons

- When a component (such as the Kanban columns) is loading, the content is masked with placeholder shapes utilizing a scanning light gradient animation:

```
@keyframes skeleton-glow {
  0% { background-position: -200% 0; }
  100% { background-position: 200% 0; }
}
background: linear-gradient(90deg, #12121a 25%, #1a1a26 50%, #12121a 75%);
background-size: 200% 100%;
animation: skeleton-glow 1.5s infinite linear;
```

4.3 Live Toast Alerts

- System alert toasts emerge from the top-right corner, translating from `translateX(120%)` to `translateX(0)` with a bouncy ease.
- Toasts automatically fade out and slide up after exactly 3000ms.
- Color theme matches status: Red for errors, Emerald for successes, Gold for system alerts.
